## **New Hydrafact Subscription Based Consultancy Services**

In response to the current challenging climate in the oil & gas industry, Hydrafact is offering a new, cost-effective approach to consultancy based on annual subscription.

Subscription packages cover technical advice, thermodynamic modelling, data interpretation and the planning of laboratory test programmes. Benefits include:

- Direct access to experts with 24/7 support on urgent operational challenges
- Innovative solutions to flow assurance problems
- Discounted priority use of advanced experimental facilities

Hydrafact can offer tailor-made solutions to the common flow assurance problems experienced during all stages of field life. Principal areas of consultancy include:

1. PVT phase behaviour & properties of reservoir fluids
2. Gas Hydrate plugging, including monitoring & early warning systems
3. Wax & asphaltene
4. Halite
5. Emulsion & foaming problems

Different levels of subscription are available at considerably reduced rates compared to one-off projects. Standard options include:

- |                                     |         |
|-------------------------------------|---------|
| • Level-4: up to 500 hours per year | £37,500 |
| • Level-3: Up to 250 hours per year | £21,250 |
| • Level-2: Up to 100 hours per year | £9,500  |
| • Level-1: Up to 50 hours per year  | £5,250  |

Subscription would typically be on an annual basis and could be upgraded at any time as required. Tailored packages including laboratory testing are also available.

Please feel free to contact us to discuss available options and/or ask any questions you may have.
